3.82(a)

Feeding.

Five of six knives in the food preparation area had a layer of grime on the blades. Three cleavers had rust present where the blade joined the handle. Using unclean utensils for food preparation can introduce disease-causing organisms and/or contaminants to the food. Per the regulations, the food must be clean, wholesome and palatable to the animals.
Corrected during inspection.

This inspection and exit interview were conducted with facility representatives.
