ANIMAL LOVE INC

Type: ROUTINE INSPECTION
Date: 19-NOV-2015

3.56(a)(1)

SANITATION.

The flooring for the two rabbits housed in a hutch has a buildup of hay and excreta at the front by the door. This needs to be cleaned out and properly disposed of. Primary enclosures shall be kept reasonably free of excreta, hair, cobwebs and other debris by periodic cleaning.

Correct by: 11-20-15.

3.130

WATERING.

The armadillo water receptacle was excessively dirty and muddy at time of this inspection. The licensee cleaned it immediately and offered the animal clean water.

Corrected at time of inspection.

The water bottle for the two prairie dogs housed in the metal trough was knocked down and buried in their hay. The licensee found the bottle and re-installed it. The holder for the water bottle is not structurally sound for the size and weight of the bottle and a new holder is needed to keep this from occurring.

Corrected at time of inspection.

The exit briefing was conducted with the President.
