MICHELLE IDDINGS

Type: RE-LICENSE INSPECTION

Date: 05-JUL-2023

### 2.75(b)(1)

#### Repeat

#### Records: Dealers and exhibitors.

The facility's list of animals on hand was not up to date and the records for acquisitions and dispositions is not complete. The records on hand states there is 1 Ring Tail Lemur instead of 2 at the facility, 1 Sloth instead of 2 at the facility, 1 Red Kangaroo instead of 4 at the facility, 1 Wolf instead of 2 at the facility, 3 Domestic Sheep instead of 9 at the facility, 1 Red Fox instead of 2, and 5 Domestic Rabbits instead of 8 at the facility. Additionally, the animals on hand does not include 1 Yak, 10 Domestic Goats, 3 Dromedary Camels, 4 Alpacas, and 4 Lamas that were present at the facility. An inaccurate record of animals on hand and incomplete records of acquisitions and dispositions does not allow for proper traceability of regulated animals. Complete records are needed for proper management of the regulated animals at a facility and those being brokered, acquired, held, and sold. Every exhibitor shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning animals other than dogs and cats, purchased or otherwise acquired, owned, held, leased, or otherwise in his or her possession or under his or her control, or which is transported, sold, euthanized, or otherwise disposed of by that dealer or exhibitor. The records shall include any offspring born of any animal while in his or her possession or under his or her control. Correct by ensuring records are current and complete.

### 2.131(e)

#### Direct

#### Handling of animals.

An adult kinkajou was observed showing signs of severe heat stress. At 1:44 pm, the kinkajou was observed by inspectors laying on its back and open mouth breathing. The animal was lethargic and was reluctant to move when inspectors were moving and talking around the enclosure. The applicant stated that the animal is normally housed indoors in an air-conditioned room and was moved outside for the inspection. The outdoor temperature according to weatherunderground.com at 1:44 PM was 88.3 degrees Fahrenheit. When the applicant was notified of the heat stress the animal was undergoing the animal was moved into an indoor air-conditioned enclosure.

Animals that are exposed to excessive heat can cause stress, dehydration, and even death. The applicant must ensure that when climatic conditions present a threat to an animal's health or well-being, appropriate measures must be taken to alleviate the impact of those conditions. An animal may never be subjected to any combination of temperature, humidity, and time that is detrimental to the animals health or well-being, taking into consideration such factors as the animals age, species, breed, and overall health status, and acclimation. Correct by 06-JULY-2023 at 5:00 PM or prior to your next scheduled relicense inspection whichever comes first.

## Inspection Report

---

This is a 2nd Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 1 more inspection or by July 14, 2023 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Your current license expired on May 15, 2023 and it is against the Animal Welfare Act to conduct regulated activity without a license.

Additional Inspectors:

Mark Sanderbeck, ANIMAL CARE INSPECTOR
