

## Inspection Report

Richard Tyree  
18801 Lewis Road  
Wanette, OK 74878

Customer ID: **324617**  
Certificate: **73-A-2626**  
Site: 001  
Richard Tyree

Type: ROUTINE INSPECTION  
Date: 11-AUG-2015

### 2.40(b)(2) REPEAT

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

At time of inspection the following medication Fenbendazole( one/half gallon) had expired on 04-10-15. This medication was intermingled with other pharmaceuticals that are currently being used in the facility and are therefore ready for use. The effectiveness of the dosage level and expected results when expired drugs are administrated to dogs could be drastically changed or may not work as anticipated. The licensee must ensure that all medications used are not expired and labeled properly in accordance with standard veterinary practices and manufacturer's recommendations. To be corrected by 09-20-15.

### 3.1(c)(1)(1)

#### HOUSING FACILITIES, GENERAL.

At time of inspection round tubing at the bottom that is attached to the divider wire of numerous enclosures is rusted and jagged with a rough edge. The rust has eaten completely through the metal exposing a hole. The affected areas are located throughout the outdoor housing. At least nine dogs are in contact with the metal tubing attached to the divider fencing. Rust can affect the structural strength of the divider panel. In addition, rust can erode and deteriorate metal surfaces. Rough edges could potentially injure the dogs. Rusted metal is difficult to clean and sanitize. The licensee must ensure that all surfaces in contact with the dogs must be free of rust. To be corrected by 10-01-15.

### 3.4(c)

#### OUTDOOR HOUSING FACILITIES.

At time of inspection one metal culvert has been converted to an outside dog house. The culvert used by two dog is located in an outdoor enclosure. There is not a floor in the metal culvert. Metal culverts are not considered to be adequate housing. Metal culvert do not provide adequate housing and the dog may experience difficulty conserving body heat during inclement weather affecting the health and well-being of the dogs. The licensee must replace the metal culvert with acceptable outdoor housing. To be corrected by 09-20-15.

Prepared By: CATHY NIEBRUEGGE, A C I USDA, APHIS, Animal Care

Date:  
05-NOV-2015

## Inspection Report

---

### 3.4(d)(2)

#### OUTDOOR HOUSING FACILITIES.

At time of inspection numerous outdoor enclosure housing two, three, or four large adult dogs ( German Sheperds, Huskies, and Blood Hounds) have one medium or one large igloo shelter for housing. These shelter structures are not large enough for all of the dogs in this enclosure to be provided with shelter that allows them to sit, stand, lie and turn freely in a normal manner. Lack of adequate housing does not provide the dogs with protection from the effects of the wind, rain or snow. Whether dogs use them or not the shelter has to be provided. The licensee must ensure that the shelter structures are large enough to allow each animal in the shelter structure to sit, stand, and lie in a normal manner, and to turn about freely. To be corrected by 09-29-15.

An exit interview was conducted by Cathy Niebruegge, ACI and facility representative.
