Certificate: 42-B-0052
Site: 001
RUBY FUR FARM, I N C

Type: ROUTINE INSPECTION
Date: 19-SEP-2018

3.127(c)

FACILITIES, OUTDOOR.

The dirt floor under approximately one-third of the raccoon enclosures (or approximately 10 percent of the facility's total animal population) has an accumulation of standing water mixed with animal wastes and pests. The rapid elimination of excess water is necessary to, among other things, reduce the animal health risks associated with odors, and vectors and disease hazards. A suitable method shall be provided to rapidly eliminate excess water. The method of drainage shall comply with applicable Federal, State, and local laws and regulations relating to pollution control or the protection of the environment.

Correct by ensuring a suitable method is provided to rapidly eliminate excess water.

This inspection and exit briefing were conducted with the facility representative.
