Type: FOCUSED INSPECTION
Date: 30-APR-2024

3.154(c)(2)

Environment enhancement to promote psychological well-being.

An adult Umbrella Cockatoo "Zeus" who is singly housed, but within eyesight and earshot of other birds, is showing signs of psychological distress in appearance through plucking and damaging its chest feathers. Zeus does not have written documentation of additional environmental enhancement approved by the attending veterinarian in the environment enhancement plan. In discussion with the attending veterinarian, they confirmed with the inspectors that the bird is showing these signs due to psychogenic factors. Failure to address signs of being in psychological distress in birds through additional environmental enhancement in accordance with attending veterinarian instructions may result in continued or worsening signs of affected animals.

Certain birds must be provided special attention regarding enhancement of their environment in accordance with the instructions of the attending veterinarian, including those that show signs of being in psychological distress through behavior or appearance.

Correct by 16 May 2024.

This inspection and exit interview were conducted with the facility representative.
