

Inspection Report

Lynn Figueroa
440 Leeway Trail
Ormond Beach, FL 32174

Customer ID: 30395
Certificate: 58-A-0249
Site: 001
LYNN FIGUEROA

Type: ROUTINE INSPECTION
Date: 04-AUG-2015

3.1(a)

HOUSING FACILITIES, GENERAL.

The metal door frame on one of the front area cages (3rd from the left) has completely deteriorated at its' lower portion leaving a gap of approx. 2 1/2". The door fastener to this part of the frame is now completely unattached. There is also another deteriorating rusty post on the front area cage (2nd from the left) There is yet another rusty deteriorated metal pole in the back area cat cage.

There are several broken wires along the upper portion of the wall between cages 2 & 3 from the right side in the front area.

These cages are no longer in good repair and not structurally sound. Repair or replace all deteriorated metal and maintain all cages in good repair.

Correct by August 31, 2015

3.1(c)(3)

HOUSING FACILITIES, GENERAL.

The licensee feeds meat/chicken directly on the cats wooden elevated resting surfaces. The surfaces in the back area cat enclosure as well as the right enclosure in the middle section were soiled with old dried blood and meat remnants (there were numerous ants on the back area resting surface that were over the food).

All surfaces which are used for feeding and animal contact shall be cleaned and sanitized when necessary to satisfy generally accepted husbandry standards/practices and minimize the attraction of insects and vermin.

Correct immediately upon receipt of this inspection report.

3.11(d)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Ants were observed in and around the chicken in the back area cat enclosure. The licensee stated that she

Inspection Report

periodically treats for ants.

An effective program for the control of insects must be maintained taking into account the safety of the cats and the weather conditions in the area. Consult with a professional pest control company if warranted and establish an effective program for the reduction of ants in the cat's food.

Correct immediately upon receipt of this inspection report

The exit interview was conducted on-site with the licensee. The licensee was made aware of the non compliances at that time.

The licensee had to leave the facility before this inspection report could be completed. By mutual agreement, this inspection report will be sent by E Mail.
