Site: JFK
CAL CARGO AIRLINES LTD

Type: ROUTINE INSPECTION
Date: 15-MAR-2024

3.15(a)(1)

Primary enclosures used to transport live dogs and cats.

On March 15, 2024 69 dogs arrived at John F. Kennedy International Airport (Queens, New York) from Ben Gurion International Airport (Lod, Israel) on Flight ICL503 (AWB# 70050760764).

The primary enclosures for 4 dogs were damaged during transit. The kennels containing the following animals were in various states damage at arrival: "Bueno" microchip# 939000011010902, "Sabah Kid 3" microchip #900215001962234, "Huwara" microchip #900233000326542, and "Malika" microchip #900233000326545. All dogs were safety moved to compliant transport enclosures prior to further transit.

A female mixed breed, brown and white, dog ("Sabah Kid 3" microchip #900215001962234) escaped her primary enclosure during transit after damaging the rear of her kennel. Members of the organization traveling with the dogs were able to secure "Sabah Kid 3" for the remainder of the flight.

Primary enclosures must be strong enough to securely contain animals and to withstand the normal rigors of transportation.

This inspection was conducted at associated cargo areas with facility and airline representatives. The exit interview was conducted by phone with an airline representative.
