Type: ROUTINE INSPECTION
Date: 09-NOV-2015

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

An approximately 2 month old male calf has evidence of loose stools stuck in the hair around his tail and back legs. The licensee stated that the calf has had diarrhea for about 3 to 4 days and that he has been treating the calf and that it looks better than it has for the past several days. However, the attending veterinarian has not been consulted regarding the health condition of the calf nor the treatment the licensee has been giving. Consult the attending veterinarian regarding the calf's diarrhea and whether or not the current treatment is appropriate and effective. Correct by November 11, 2015.

This is a focused inspection of animals only.

Inspection and exit interview conducted with the licensee.

End of report.
