Customer ID: **11495**  
Certificate: **14-C-0131**  
Site: 001  
Buttonwood Park Zoo

Type: ROUTINE INSPECTION  
Date: 14-NOV-2024

---

### 3.153(a)(1)(x)

#### Primary enclosures.

The "Duck Pen" houses a variety of duck species and one Green Aracari. The floor of the enclosure has a dirt substrate with a layer of 1" x 1/2" wire mesh buried underneath the dirt. There was an approximately 2" by 10" irregularly shaped area of the floor surface where the dirt was not present, and some of the wire mesh was exposed. The Green Aracari was observed walking on another area of the floor of the enclosure at the time of the inspection.

Per this Section, primary enclosures must be kept in good repair and maintained so that they have floors that are constructed in a manner that protects the birds' feet and legs from injury. The exposed section of wire mesh of the enclosure floor poses a risk of injury to the feet/digits/legs of the Green Aracari from entrapment in the wire mesh. Facility corrected this item during the inspection by adding dirt substrate to cover the exposed wire mesh in the floor. To remain corrected from this date 11/14/24 forward.

This inspection and exit briefing were conducted with facility representatives.
