Type: ROUTINE INSPECTION

Date: 17-AUG-2023

3.125(a)

Facilities, general.

The camels are actively chewing on wood around their exhibit, along the back fences and in the shelter area. One section of wood being chewed is painted green, but the paint is flaking off, which could potentially be ingested. This section of fence needs to be addressed for the safety of the animals and to keep the area in good repair.
