Certificate: **51-C-0108**

Site: 001

PLUMPTON PARK ZOOLOGICAL GARDENS INC

Type: ROUTINE INSPECTION

Date: 18-FEB-2016

### 3.125(a)

#### FACILITIES, GENERAL.

The enclosure housing the Hereford cow had two fence posts along the back fence (in the excessively muddy area) that were leaning outward into the llama enclosure. Leaning fence posts may weaken the structural strength of the enclosure fencing. All animal enclosures must be structurally sound to contain the animals. Once APHIS officials identified the leaning fence posts, facility maintenance personnel repaired the fence. Corrected at time of inspection.

### 3.127(c)

#### FACILITIES, OUTDOOR.

The L shaped enclosure housing the Hereford cow is excessively muddy in the back area from the shelter to the fence where the water bucket is attached. There are puddles of water around the water receptacle. Animals should not have to walk through mud to get to their water or shelter. Standing in mud can cause animals to have foot problems such as foot rot. A suitable method shall be provided to rapidly eliminate excess water. The area of the enclosure from the shelter to the water receptacle needs to be dry to maintain the health and comfort of the animal. Correct by March 10, 2016.

An exit briefing was conducted with the zoo director; Robert Markmann, ACI; and Mary Geib, VMO.

#### Additional Inspectors

Geib Mary, Veterinary Medical Officer

Prepared By: ROBERT MARKMANN, A C I USDA, APHIS, Animal Care
