Type: ROUTINE INSPECTION
Date: 18-FEB-2014

3.125(a)

FACILITIES, GENERAL.

In an outdoor pen housing a serval and two domestic cats, there is a horizontal shade structure/resting surface composed of a wooden top with a metal support post. Paint is peeling in multiple places on this wooden top, and several areas of wood are sunken and appear to be decomposing. This could potentially result in injury if an animal where to jump onto the surface. Facilities must be maintained in good repair to maintain good husbandry standards and protect the enclosed animals.

Correct by: 21 February 2014

Inspection and exit interview conducted with facility representative.
