3.125(a) REPEAT

FACILITIES, GENERAL.

*** The center wire panel in the lynx enclosure that was identified the last inspection was not removed or repaired. The wire section is broken creating a hole with broken protruding wires. This section of wire could cause potential injury to the animal if it crosses through to get to the other side of the enclosure. This panel needs to be repaired for the safety of the animal and to keep the enclosure in good condition.

3.125(d)

FACILITIES, GENERAL.

*** There were carcass remains in the lynx and caracal enclosures that had been fed out a few weeks ago according to the caretaker. Food waste needs to be removed in a timely manner to reduce odors and disease hazards and for the health of the animals.
