Larry Wallach  
551 Veterans Memorial Highway  
Hauppauge, NY 11788

Customer ID: **2134**  
Certificate: **21-C-0069**  
Site: 002  
Larry Wallach

Type: ROUTINE INSPECTION  
Date: 15-AUG-2023

---

### 2.40(a)(1)

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

At the time of inspection, the written program of veterinary care was incomplete. The document only listed sloths, no other animals at the facility. A written program veterinary care is required to demonstrate that adequate veterinary care and Attending Veterinarian oversight is being provided to all regulated animals. A written program of veterinary care covering all animals must be completed and reviewed by the Attending Veterinarian and available for inspection by APHIS officials. Correct by August 22, 2023.

### 3.126(a)

#### Facilities, indoor.

In the sloth enclosure the humidity was not within appropriate parameters. One sloth, Cosmo, was seen scratching at his skin. The humidity recorded on the kestrel in several areas of the enclosure ranged from 54%-55%. Sloths as a species are very sensitive to temperature and humidity, requiring temperature of 75-85 degrees F and 60-80 % humidity for overall health. At the time of inspection, the licensee corrected the humidity to the appropriate range, and Cosmo ceased scratching. Correct from this day, August 15, 2023, forward.

This inspection and exit interview were conducted with the licensee.

Additional Inspectors:

Karla Wills, ANIMAL CARE INSPECTOR
