Customer ID: **30633**

Certificate: **72-C-0212**

Site: 001

GATORS & FRIENDS, L L C

Type: ROUTINE INSPECTION

Date: 11-JUL-2024

---

### 3.125(a)

#### Facilities, general.

The Jacobs sheep enclosure is not in good repair. The front side of the primary enclosure fence has broken projecting wires at the level of the animals' head/face. The fencing on the left has large gaping areas that the sheep can place the entire head through. One of the sheep was sticking his nose through the fence near the broken wires at the time of inspection. Failure to maintain enclosure fencing can cause sharp points to serve as a source of entrapment or injury to the animals face and eyes.

Correct by ensuring fences are structurally sound and maintained in good repair to protect the animals from injury and to contain the animals.

Correct by July 19, 2024.

This inspection and exit interview were conducted with the licensee.
