

## Inspection Report

West Virginia University  
886 Chestnut Ridge Rd  
P O Box 6845  
Morgantown, WV 26506

Customer ID: 276  
Certificate: 54-R-0001  
Site: 001  
MORGANTOWN CAMPUS

Type: ROUTINE INSPECTION  
Date: 23-JUN-2015

### 2.31(d)(1)(2)

#### INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

Four protocols (12-0705, 12-0706, 13-803, and 14-0905) from three principle investigators had searches that did not focus on the painful/distressful procedures as required by the regulation. Proper searches are the best method of identifying alternatives (Refinements, Reductions and Replacements) that will minimize discomfort, distress, and pain to the animals. The principal investigator must consider alternatives to procedures that may cause more than momentary or slight pain or distress to the animals. Correct from this point forward on protocols submitted for approval and renewal.

### 3.125(a)

#### FACILITIES, GENERAL.

The shelter in the rear of the quarantine pen containing 13 sheep had a gap under the far side at ground level. This gap was sufficiently large to allow a sheep to pass its head under the wall and possibly become entrapped. Possible sources of entrapment and injury must be identified and corrected to avoid injury to the animals. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals. Correct by: 29 June 2015

An exit briefing was conducted with the Attending Veterinarian, IACUC Chair, OLAR director and ORIC staff.

Prepared By: DAVID OELBERG, D V M USDA, APHIS, Animal Care
