Tuscaloosa, AL 35406

Customer ID: **330062**  
Certificate: **64-C-0224**  
Site: 001  
DANIEL COMBS

Type: ROUTINE INSPECTION  
Date: 10-AUG-2016

---

### 3.51(d) REPEAT

#### FACILITIES, INDOOR.

\*\* The housing surfaces for the rabbits are constructed with untreated wood. There were many stains on the surface that can not be properly sanitized because the surfaces are not impervious to moisture. The housing surfaces shall be constructed and maintained so that they are substantially impervious to moisture and may be readily sanitized for the health and well-being of the animals.

### 3.54(b)

#### FEEDING.

\*\* The rabbits were being fed on the top of the hutch and the food was intermingling with their feces. Food shall be free of contamination and should be fed in a manner (food receptacles) to minimize contamination by excreta.  
Correct by August 13, 2016

### 3.125(a) REPEAT

#### FACILITIES, GENERAL.

\*\* In the pen enclosing a llama near the pond there were areas of the fencing that was in disrepair with some pointy ends.

\*\* In the enclosure containing a cow the fences top strand is constructed of barbed wire in which the animals have direct contact.

\*\* There were several strands of orange hay bale twine on the ground within the front goat enclosure that could possibly be ingested.

\*\* In the upper pen containing 2 goats and 5 sheep there were several areas of the primary fence that the top two strands were constructed of barbed wire. To the far left corner of the fencing there was a strand of barbed wire haphazardly strung around the top the fencing to tie the loose end in which the animals can have direct contact.

All of the enclosures should be constructed to prevent injury of the animals including the materials used for the

---

fencing and keeping it in good repair.

### 3.127(b) REPEAT

#### FACILITIES, OUTDOOR.

\*\* In the upper pen enclosing 2 goats and 5 sheep there was one shelter with only one side. The shelter would be insufficient for the local climatic conditions (tornadoes and high winds). Artificial shelters appropriate to the local climatic conditions for the species concerned shall be provided for all animals kept outdoors to afford them protection and to prevent discomfort to such animals.

The inspection and exit interview were conducted with the owner
