Type: ROUTINE INSPECTION  
Date: 14-MAR-2025

---

### 3.150(c)(2)

#### Facilities, general.

The outdoor enclosure for 2 Yellow-naped Amazons has an approximately 1-inch-long hole in the metal frame (portion that is in contact with the ground) due to presence of rust. The presence of the rust makes it difficult to clean and sanitize surfaces and over time can lead to structural integrity issues with the metal. The surfaces of the bird housing facilities must be free of rust or damage.

Correct by 14 April 2025.

### 3.153(a)(1)(i)

#### Primary enclosures.

The outdoor enclosure for 2 Laughing Kookaburras has a metal wire fastener approximately 3 inches in length pointing into the enclosure. Sharp points in enclosures have the potential to injure birds. Primary enclosures must be constructed and maintained so that they have no sharp points or edges that could injure the birds and must be kept in good repair. Corrected at time of inspection.

Correct from this date forward of 14 March 2025.

This inspection and exit interview were conducted with the licensee.
