UNIVERSITY OF MARYLAND
COLLEGE PARK

Type: ROUTINE INSPECTION

Date: 31-MAY-2023

2.33(b)(3) Critical

Attending veterinarian and adequate veterinary care.

Daily Observation

On March 22, 2023 three (3) gerbils were found dead in their cage. It was noted that no food was in the cage hopper, but an adequate amount of water was still present in the bottle. All other cages housing gerbils had adequate amounts of food and water.

The well-being of the three gerbils was negatively affected by the failure to observe that no food was provided within at least a 24-hour period. Facilities must ensure animals are provided a sufficient quantity food daily.

Correction: Appropriate corrective actions were implemented prior to inspection that included discussions with all care staff regarding relevant animal care program SOPs and expectations, and the implementation of a dual check system for daily observations.

This inspection and exit interview were conducted with the facility representatives.
