2.131(c)(1)

Handling of animals.

Several animal enclosures do not have sufficient distance and/or barriers between the animal and the general viewing public. Two enclosures (fox and adult dingos) do not have a barrier between the public and the animals other than the enclosure fence. Other enclosures (wolves/wolfdogs, coatimundis and serval) have insufficient barriers. The barrier consists of a single rope. The ropes can easily be stepped over or pushed aside (are loose and low) or do not encompass the enclosure (people can just walk around the barrier). No attendant is on duty at these enclosures. Sufficient distance and/or barriers are required to assure the safety of the animals and the public. The facility shall assure that during public exhibition there is sufficient distance and/or barriers between the animal and the general viewing public. Correct by 1/19/23.

2.134(a)

Contingency planning.

The facility has not yet developed and documented a contingency plan for the animals in the event of an emergency or disaster which could reasonably be anticipated. The facility does have a Safety Plan in place for people and a plan for Animal Escapes. A contingency plan is necessary to provide for the humane handling, treatment, transportation, housing
