Certificate: **58-C-1089**
Site: 001
RICHARD S SANDLER MD

Type: ROUTINE INSPECTION
Date: 21-OCT-2021

3.125(a) Repeat

Facilities, general.

The outdoor housing for the fox had chain mesh fencing on the ground to prevent excessive digging. The mesh is fully exposed. The animal could get a foot caught in the holes in the chain mesh and get injured. The outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals. The mesh needs to be covered to prevent possible injury to the animal.

Correct by: 10-23-2021

3.131(a)

Sanitation.

In the indoor housing for the 2 raccoons and 1 ringtail lemur there was a buildup of feed/fecal waste on the bottom of the enclosures and the climbing apparatuses, shelves and perches contained within. Excreta shall be removed from primary enclosures as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and to reduce odors. The enclosures need to be cleaned and sanitized.
