RICHARD ROTH

Type: ROUTINE INSPECTION
Date: 11-AUG-2014

3.131(c)

SANITATION.

At the time of inspection the flying squirrel enclosure had an accumulation of grime on the bottom edges and floor of the epoxy-coated wire enclosure. The epoxy was flaking off in large pieces on the floor of the enclosure allowing for a potential of rust to develop on the exposed metal. The animals housed could be adversely affected by this flaking epoxy or debris present in the enclosure. The facility must ensure that premises are kept clean to protect the animals from injury.

Correct by 15 August 2014

An exit briefing was conducted with the licensee.
