Certificate: **71-A-1246**
Site: 001
BARBARA FORST

Type: ROUTINE INSPECTION
Date: 29-SEP-2017

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

** A nine year old, female, Maltese, micro-chip #039282076. Had dull, cloudy eyes, this can be a sign of illness and/or injury.

** A twelve year old, female Yorkshire Terrier, micro-chip #042279556. Had a cloudy right eye, this can be a sign of illness and/or injury. The teeth had dark matter accumulating on the teeth and encasing the cheek teeth. This can be a sign of dental disease, which can cause tooth loss, can be painful and contribute to other health problems. The dogs toenails also need to be trimmed. Overgrown toenails can cause problems with normal stance and locomotion, can get caught on wire flooring and be painful.

The dogs listed above must be evaluated by a veterinarian to determine if treatment is necessary. The owner with the attending veterinarian must also establish a dental program for the kennel. To be corrected by: 10-02-17.

** A ten year old, male, Maltese, micro-chip #103772374. Had hair matting on the legs and feet. Hair matting can harbor moisture, dirt, feces, be painful and irritate the skin. The hair mats must be removed and maintained. To be corrected by: 10-02-17.

** One bottle of Clavamox in the whelping building had an expiration date of 10-08. The use of expired medicine can be ineffective and dangerous for the animals and is not appropriate to prevent, control and treat disease and injuries. The owner must remove the expired medicine and ensure that expired medicines are not used. This was corrected during the inspection.

2.50(a)(1)

TIME AND METHOD OF IDENTIFICATION.

** The puppies at the facility were not properly identified. Cage cards can be used to identify puppies. The cards must have the letters USDA, the license number, the puppies individual identification, the date of birth, sex, brief
