2.75

Records: Dealers and exhibitors.

The facility does not have records of acquisition for three goats. Additionally, the records of acquisitions for one guinea pig, one hamster, one chinchilla, and one rabbit are incomplete. These records are missing the complete addresses of the donors or sellers. Finally, the record of acquisition for one pig is missing the date the animal was acquired. Records containing all the information in 2.75 (b)(1) of the Animal Welfare Act (AWA) are necessary to track animals entering and leaving the facility. Ensure records contain all the information required in the AWA.

2.131(b)(1) Critical

Handling of animals.

Facility staff didn't handle a rabbit as carefully as possible when they failed to secure the inside/outside access door in the rabbit enclosure on or around the evening of 12/28/21. As per the facility representative, a female Netherland dwarf rabbit was able to gain access to the outdoor area of the enclosure after the inside/outside access door was thought to be secured. While the rabbit was outside, the door was shut due to winds and the animal was unable to go back to the inside area of the enclosure as per the facility representative. The rabbit was discovered deceased on the following day. Ensure proper handling methods of rabbits are in place to prevent physical harm of animals.

Note: The facility has implemented multiple processes and changed the door latch to prevent future incidents.
