Type: ROUTINE INSPECTION
Date: 05-MAR-2024

2.75(b)(1)

Records: Dealers and exhibitors.

The record of animals on hand was incomplete and there was no acquisition information available for the macaws or the grey foxes. Facility has had the macaws for many years, but estimated that the grey foxes, Squilly & Dilly had arrived in July of 2021 at approximately 8 months old. Complete and accurate records are needed to ensure each animal can be known with certainty and facilitate the ability to trace all animals. The licensee shall make, keep and maintain records or forms which correctly disclose the required information concerning animals other than dogs or cats, purchased or otherwise acquired, or which is transported, sold, euthanized or otherwise disposed of by the exhibitor, including any offspring born.

Correct by 18 March, 2024

3.158(d)

Cleaning, sanitization, housekeeping, and pest control.

In the macaw outdoor enclosure, there was a songbird nest built between the fence top and the cover, and the avian pests were freely entering and leaving the enclosure, contaminating the food and water. Additionally, in the kitchen area, there was also a collection of flies that was circling above the food items not stored in the fridges or freezers. A safe and effective program for the control of insects, ectoparasites and avian and mammalian pests must be established and maintained so as to promote the health and well-being of the birds and reduce contamination by pests in animal areas.

Correct by 19 March, 2024

This inspection and exit interview were conducted with the licensee.
