

## Inspection Report

Melissa Miller  
475 S Lick Creek Rd  
Buncombe, IL 62912

Customer ID: **32678**  
Certificate: **33-A-0556**  
Site: 001  
MILLERS KENNELS

Type: ROUTINE INSPECTION  
Date: 26-APR-2016

### 2.75(a)(1)

#### RECORDS: DEALERS AND EXHIBITORS.

There are 3 litters(2 Weimaraner, 1 Silky Terrier) of puppies that do not have puppy records with the female ID, USDA number, sex, DOB and description of each puppy or puppy ID number for 3 Silky Terriers that are not with the female.

Complete and accurate puppy records are necessary for proper traceability and management of the regulated animals.

The licensee must keep updated puppy records for all puppies in a litter with the females information, DOB, sex, description and dates sold or died.

To be corrected by: April 28, 2016

### 2.75(a)(2)

#### RECORDS: DEALERS AND EXHIBITORS.

The Disposition 7006 forms have not been used when selling regulated animals. There are receipts with most of the required information being kept, however the ID numbers of the animals sold are not on the receipt, and the proper 7006 Disposition forms have not been used.

All records must be kept on the correct forms, including all sales, donations and transfers on the Disposition of Dogs and Cats 7006 form.

The licensee must utilize the Disposition 7006 form and fill it out completely with the required information for all sales, donations and transfers of regulated animals.

To be corrected by: April 26, 2016

### 3.1(c)(3)

## Inspection Report

---

### HOUSING FACILITIES, GENERAL.

There are six primary enclosures that have rubber mats that have a buildup of dirt and grime around the edges between the mats and wall and throughout the dimpled/pegged surface of the mat that holds dirt to it. The flap doors that lead to the outdoor runs have a heavy buildup of brown/black grime on both sides of the door, and around the inserts and inside walls around the doors where the dogs faces rub when opening the flaps. The cement instep along the front of these 6 kennels have a thick buildup of dirt, hair and grime that has not been cleaned properly and is also building up on the bottom of the fence. While the kennel runs are very clean and kept up daily, the indoor areas have not been scrubbed and sanitized in several weeks.

A buildup of dirt and grime on the surfaces of the kennel that the regulated animals come in contact with can be a possible health issue and source of disease and bacteria.

All surfaces, flooring, walls, matts, fencing, door flaps and inserts must be cleaned thoroughly and sanitized at least once every 2 weeks or as often as necessary to prevent the buildup of hair, dirt and grime.

To be corrected by: May 5, 2016

Inspection and exit interview conducted with licensee.
