Type: ROUTINE INSPECTION
Date: 23-FEB-2016

2.50(c)(2)(2) REPEAT

TIME AND METHOD OF IDENTIFICATION.

Licensee did not have the record book updated to contain the required information for four dogs (Otis, Bo, Kato, Zeke) used for exhibition. Identification tags, written descriptions, and clear photographs of these animals were not available. Appropriate identification of dogs used in exhibition is necessary to ensure that animals have been acquired legally and are able to be tracked to ensure humane transport, care, and use in regulated activities. Class "C" exhibitors shall identify all dogs under his or her control whether held, purchased, or otherwise acquired with the required identification methods under this Section of the AWA regulations.

Original Correction date of 12/28/2015.

2.75(a)(1)

RECORDS: DEALERS AND EXHIBITORS.

Acquisition records are incomplete. The required acquisition information for dogs, Zeke (a mixed-breed, male) and Bo (a Border Collie, male) are not included in the records. Complete and accurate documentation of acquired animals is essential for proper identification and in order to facilitate the tracking of animals. Each exhibitor shall make, keep, and maintain records or forms which fully and correctly disclose the required information concerning each dog or cat purchased or otherwise acquired, owned, held, or otherwise in his or her possession or under his or her control, or which is transported, euthanized, sold, or otherwise disposed of by that dealer or exhibitor. Records must be current and maintained.

Correct by 03-26-2016.

3.1(c)(1)(1) REPEAT

HOUSING FACILITIES, GENERAL.

Several dog kennels had an excessive, buildup of rust on the interior, metal walls and on the wire, chain-link fencing and gate support posts. Any interior surfaces that come in contact with the animals must be free of excessive rust

Inspection Report

that prevents required cleaning and sanitation and any potential for structural damage. A system of facility maintenance, repair or replacement of all surfaces in contact with dogs must be in place.

Original Correction date of 02/01/2015.

3.1(c)(3) REPEAT

HOUSING FACILITIES, GENERAL.

The front, chain-link gates of several, indoor dog kennels had a heavy buildup of a mixture of hair, dirt, and debris. All enclosures for dogs must be spot-cleaned daily and sanitized at least once every 2 weeks or more often as necessary to prevent an accumulation of dirt, debris, food waste, excreta, and other disease hazards. A system of timely and effective cleaning and sanitation practices must be in place.

Original Correction date of 12/14/2015.

3.6(a)(2)(2)

PRIMARY ENCLOSURES.

The primary enclosure for dog, Popeye, contained an elevated dog bed with torn, frayed edges from a large hole in one corner of the bed. Bedding material which has become torn or frayed poses the risk of injury or foreign body ingestion and potential blockage of the digestive tract of the animals.

There was a torn, stainless steel water bowl with pointed and sharp edges fastened to the chain-link door of the primary enclosure for dog, Barney. Sharp, protruding points or edges in areas of contact with the animals may lead to injury.

All enclosures must be kept in good repair and free of sharp points, protruding edges or other hazards in order to protect the animals from injury and to ensure their health and well-being. A system of timely identification, facility repair and maintenance must be in place.

Correct by 03/03/2016.

3.11(c) REPEAT

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Food preparation room/kitchen: There was an excessive buildup of dust, dirt and debris on the floor as well as underneath and inside cabinet shelves/drawers used to store animal items.

Inspection Report

Travel vehicle: A moderate accumulation of dust, hair, and debris is present in animal areas including: the floor, in corners and between spaces of stacked dog crates.

Premises where housing facilities are located must be kept clean, free of clutter and in good repair in order to protect the health and well-being of the animals, to prevent the harborage of vermin and pests, and to facilitate the prescribed husbandry practices. A system of maintaining effective housekeeping practices must be in place.

Original Correction date of 12/14/2015.

Exit interview conducted with facility representative.
