## Inspection Report

---

Item 3.15 a 1 Primary enclosure used to transport live dogs and cats

On July 19, 2021, Triangle services delivered 2 cats in transport from the cargo facility at JFK airport to the airplane of Alaska Airlines flt 393. During this transport one of the cats was able to escape out of his primary enclosure as well as the transport cart that Triangle Services was using to transport the animals from cargo to the airplane. This animal was eventually safely recovered .

Transporters conducting regulated activity must ensure that the primary enclosure containing the animal is strong enough to securely contain the animal and withstand the rigors of transportation.

This inspection and exit interview were conducted with the facility representative.
