Murray, NE 68409

Customer ID: **327646**

Certificate: **47-C-0059**

Site: 004

Scatter Joy Acres Inc

Type: ROUTINE INSPECTION

Date: 10-OCT-2024

---

### 3.125(a)

#### Facilities, general.

\* Three enclosures, all housing two Dromedary Camels, six Alpacas, one Llama, two Red Kangaroos and three Wallabies, have Conex containers for shelter. The pressed foam insulation is exposed in these shelters and shows signs of chewing and or scratching along the edges of the insulation. This insulation is at head level allowing access for the animals of concern. As a result, the animals could chew or eat the insulation causing injury.

\* The Shelter used to house the two Red Kangaroos and Three Wallabies, has an electric heater mount on the wall inside the shelter. The electrical cords for this heater are hanging down, from the heater to the outlet inside the enclosure. These cords were not live, but are at head level of the animals of concern. The animals can chew and or get tangled in the cords causing injury.

For the prevention of injury, all housing for the animals must be constructed of material, the insulation, appropriate for the animals involved. This also includes the electrical wires hanging down into the enclosure must be constructed as to prevent injury.

To be corrected by 22-October-2024.

This inspection and exit interview were conducted with the facility representative.
