

## Inspection Report

Fox Valley Wildlife Center Inc  
P O Box 385  
Elburn, IL 60119

Customer ID: **20023**  
Certificate: **33-C-0364**  
Site: 001  
FOX VALLEY WILDLIFE CENTER

Type: ROUTINE INSPECTION  
Date: 19-NOV-2019

### 3.131(d)

#### SANITATION.

Excessive amounts of rodent feces were observed in two areas of the facility during the time of inspection. In the facility's largest animal room, an animal transport kennel located next the squirrel's enclosure had an abundance of feces inside. In the kitchen and food preparation area, a large concentration of feces was present under the refrigerator. Finally an abundance of feces was present on the floor, behind the sealed food containers. The facility has a pest control program in place, but it is not effectively controlling the population of rodents. Rodents and their feces can carry and spread diseases.

An effective program for the control of rodents must be implemented and maintained at the facility.

To be corrected: 12-19-19

This inspection and exit interview were conducted with the facility representative.
