Site: 001  
ALL CAMPUS SITES

Type: ROUTINE INSPECTION  
Date: 16-OCT-2024

---

### 2.38(f)(1) Critical

#### Miscellaneous.

On July 11, 2024, a black vulture escaped from the facility while being placed into a transport enclosure in an outdoor area located immediately adjacent to the outdoor portion of vulture's primary enclosure. The vulture escaped from the transport enclosure before the transport enclosure door could be closed and was never recaptured.

Birds that escape are at increased risk of disease and injury. Furthermore, birds that escape their enclosure may have limited access to food, water, and shelter.

Handling of all animals shall be done as carefully as possible in a manner that does not cause trauma, overheating, excessive cooling, behavioral stress, physical harm, or unnecessary discomfort. Handling must also be conducted in a way that prevents escape.

Corrected at the time of inspection (October 16th, 2024).

This inspection and exit interview were conducted with facility representatives.

Additional Inspectors:

Kristin Ray, VETERINARY MEDICAL OFFICER
