Joyce Cairns
375 N 100th Rd
Glasco, KS 67445

Customer ID: **4176**
Certificate: **48-A-1027**
Site: 001
Joyce Cairns

Type: ROUTINE INSPECTION
Date: 05-JUL-2018

2.40(b)(2) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Male, adult Akita (chip number OAO2262114 according to APHIS form 7005, microchip scanner inoperable) has hair loss on both sides of his body, along the length of his back and on the outsides of his thighs. The exposed skin and the haired skin along his backbone and shoulders has a thick, scaly appearance in places. There is some fresh blood on the right side of the hairless area. The licensee stated that this dog is under treatment for thyroid disease. Inspectors spoke with the attending veterinarian (AV) and verified this diagnosis. The AV also verified that he prescribed ongoing thyroid medication that the dog should be currently receiving. The licensee stated that she does not currently have thyroid medication for the dog and the dog is not receiving medication at this time. Failure to follow the directions for medical care from the AV can result in unresolved medical problems and prolonged illness and discomfort. The licensee must follow the directions for medical care provided by the veterinarian.

This inspection and exit interview were conducted with the facility representatives.

Additional Inspectors

Lundy Kendall, Animal Care Inspector
