SEA WORLD OF FLORIDA

Type: ROUTINE INSPECTION
Date: 21-JUL-2015

3.106(b)(3)

WATER QUALITY.

Water samples are collected at 8:00 AM daily. On May 13, 2015, no sample(s) were taken from the DNP pool for salinity & pH determinations, but were taken for chlorine testing. On the same day, no sample was obtained from PPP for salinity levels, but was also taken for chlorine. On May 15, 2015, no samples were taken from DNP for either pH or salinity determinations, but were again taken for chlorine. There, however, were no detrimental effects on water quality or the animals in these pools due to the lack of these tests on these dates

It appears that if the responsible person(s) does not collect these water samples (for any reason) at 8:00 AM than it does not get done that day. There are no checks to assure that all of the required water samples are taken daily.

A mechanism for assuring that all required water samples, (and water tests) shall be collected & tested daily shall be implemented.

Correct by July 24, 2015

This inspection encompasses SeaWorld of Florida, Aquatica, & Discovery Cove. Inspection was performed on July 21-23, 2015.

Due to technical difficulties, this inspection report could not be completed at the time of the inspection and will be E Mailed to the Vice President.

The exit interview was conducted on-site with the Vice President of Zoological Operations, the Curator of Mammals and a facility veterinarian.
