ALLERGY LABORATORIES, INC.

Type: ROUTINE INSPECTION

Date: 14-JUL-2014

3.31(a)(1) REPEAT

SANITATION.

- At the time of inspection, there was an excessive accumulation of excreta in the guinea pig cages. The presence of excessive feces in the enclosure increases environmental contamination and may have a negative impact on the health and welfare of the enclosed animals. Enclosures must be cleaned as often as needed to prevent accumulation of excreta. This affects at least 12 enclosures.
