

Inspection Report

Sea World of Florida
7007 Sea World Drive
Orlando, FL 32821

Customer ID: **3108**
Certificate: **58-C-0077**
Site: 002
SEA WORLD OF FLORIDA

Type: ROUTINE INSPECTION
Date: 11-SEP-2023

3.150(c)(2)

Facilities, general.

The enclosure housing 26 Magellanic Penguins and 1 Kelp Gull had white material flaking on the ceiling and on one wall underneath an air vent, at the approximate beak height of the penguins. Surfaces must be free of damage that affects structural integrity of the surface or prevents cleaning. These surfaces need to be addressed to ensure that the enclosure can be fully cleaned.

To be completed in two phases as the birds are in molt.

Phase 1) restrict bird access to the area on the wall by September 20, 2023

Phase 2) full correction by December 15, 2023

3.155(a)

Feeding

In the general commissary food prep area, there were two bottles of supplements for 5 brown pelicans and 4 American white pelicans that were expired. One bottle of "B Complex with Vitamin C Stress Formula" expired 7/2023 and one bottle of "Super 10 Antioxidant" expired 8/2023. Food must be of sufficient nutritive value to maintain a healthy condition and weight range of the bird and to meet its normal daily nutritional requirements. The nutritive quality of expired supplements cannot be guaranteed and should not be used.

Corrected by facility in front of the inspectors September 11, 2023

This inspection and exit interview were conducted with facility representatives.

Additional Inspectors:

KATIE PRICE, VETERINARY MEDICAL OFFICER
