

## Inspection Report

Ronald Van Herwyn  
2637 Booker Rd  
Mc Kenzie, AL 36456

Customer ID: **41708**  
Certificate: **64-C-0195**  
Site: 001  
RON VAN HERWYN

Type: ROUTINE INSPECTION  
Date: 25-OCT-2017

### 3.125(a)

#### FACILITIES, GENERAL.

\*\* In several raccoon enclosures there were areas where the wood was chewed or broken that need to be replaced. In the foxes, skunks and groundhogs enclosures' the fencing lining the ground was exposed and an animals foot could possibly get caught or the animal could trip. The rain is washing the ground away and it needs to be reinforced. These structural repairs need to occur to prevent the animals from injuring themselves or compromising the structural strength of the enclosures or perches that the animals utilize. Correct by December 5, 2017.

### 3.125(d)

#### FACILITIES, GENERAL.

\*\* In the primary enclosures for the raccoons, foxes and coatimundi's there were many toys that were broken, torn and soiled that need to be removed. There were pieces of broken wood, soiled blankets and pillows that were beyond washing. In one raccoons enclosure there was a torn shade cloth that had been shredded and falling through the top of the enclosure. In the coatimundi's enclosure there were old fruit cup containers that had not been removed. Trash, bedding, debris, food waste and broken or soiled items must be removed and disposed of to minimize vermin infestation, odors and disease hazards. Correct by November 5, 2017

### 3.131(d)

#### SANITATION.

\*\* In the coatimundi's enclosure that contained Taz and the enclosure for the skunks and groundhogs there were an abundance of flies. It is assumed that the flies are attracted to the produce and eggs that are being given. A pest management plan should be implemented to minimize the flies in these animals enclosures. The facility should look at options to do so and increase the frequency in which the enclosures are cleaned to remove the inciting factors for the good health and well-being of the animals. Correct by November 14, 2017

This inspection and exit interview were conducted with the owner.
