### 3.81

#### Environment enhancement to promote psychological well-being.

At the time of inspection, there was no documented program of environmental enhancement available for review, for the non-human primates housed at the facility. An adequate environmental enhancement program is essential in promoting the psychological well-being of non-human primates. Dealers, exhibitors, and research facilities must develop, document, and follow an appropriate plan for environment enhancement adequate to promote the psychological well-being of non-human primates. This plan must be made available to APHIS upon request. To be corrected by March 22, 2025.

This inspection and exit interview were conducted with a facility representative.
