3.13(a)(3)

Veterinary care for dogs.

The facility is not vaccinating dogs for rabies. The Program of Veterinary Care on file states under the Vaccination Schedule for Rabies "N/A-closed colony". The facility consists of indoor outdoor runs such that dogs can have face to face access through fencing with each other or with wild animals that might approach the outdoor runs.

Failure to vaccinate for rabies can result in dogs being exposed to a serious disease risk.

The Program of Veterinary Care must include vaccinations for contagious and/or deadly diseases of dogs including rabies.

Correct by: Update the Program of Veterinary Care to include a rabies vaccination schedule and begin vaccinations by September 28, 2023

This inspection and exit interview were conducted with the registrant.
