125 N County Road 425 E
Arcola, IL 61910

Customer ID: **334212**
Certificate: **33-C-0483**
Site: 001
Aikman Wildlife LLC

Type: ROUTINE INSPECTION
Date: 05-SEP-2024

3.157(a)(2)

Water quality.

There is a small man made pond approximately 50ft x 25ftx3ft that has an excessive accumulation of thick green algae throughout the water that does not allow for any visual under the water of the bottom or sides of the pond. The pond has not been properly cleaned or sanitized in at least 2 months to allow for or maintain appropriate water quality for the birds that require clean water sources to swim in. There were no waterfowl swimming in the pond on the 90 day during the inspection. While the waterfowl and other birds contained in the pond area appeared healthy, the pond water quality was very poor and not acceptable according to current professionally accepted standards.

The buildup of algae and dirt/debris in a pond that is utilized for swimming and drinking or feeding by waterfowl or other birds in the enclosure can be a possible source of harmful bacteria or other health related issues that could result from swimming in or ingesting the water that is primarily full of algae.

Pools or other aquatic areas with drainage systems must provide adequate drainage and must be located so that all of the water contained in such pools or other aquatic areas may be effectively eliminated when necessary for cleaning the pool or other aquatic area or for other purposes. Pools or other aquatic areas without drainage systems must be aerated and have an incoming flow of fresh water or be managed in a manner that maintains appropriate water quality in accordance with current professionally accepted standards appropriate for the species.

To be corrected by: September 16, 2024

This inspection and exit interview were conducted with facility representative.
