Type: ROUTINE INSPECTION

Date: 01-MAR-2024

---

**3.127(c)**                      **Direct**

**Facilities, outdoor.**

The enclosure for the two wolves has standing water and mud and provides no dry area for the animals. There are no areas in the enclosure in which the animals can stand, sit, or move around in without being in the water/mud. In addition, the bedding in the wolves' shelter is damp. Standing water and muddy conditions without access to a dry area can cause discomfort, thus affecting the health and welfare of the animals.

A suitable method shall be provided to rapidly eliminate excess water. The animals must have access to a dry area in the enclosure. Corrected during the inspection.

A complete routine inspection was conducted starting on 1-MAR-2024. This inspection report is limited to the Direct non-compliance identified during that inspection. An additional inspection report will be delivered with the other issues identified during this inspection.

This inspection and exit interview were conducted with the licensee.
