GLENFORD MARTIN

Type: ROUTINE INSPECTION
Date: 12-SEP-2022

2.40(a) Repeat

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The licensee has identified an attending veterinarian but formal arrangements have not been made. Also, no program of veterinary care has been established or written. The identified veterinarian has agreed verbally to provide veterinary services.

All guinea pigs at the time of inspection were in good health and body condition.

All licensed facilities must employ an attending veterinarian to provide adequate veterinary care for the animals and to establish a program of veterinary care. An attending veterinarian must be obtained under formal contract to write a program of veterinary care for the guinea pigs; provide veterinary care and consultation; and to give husbandry guidance to ensure the guinea pigs remain in good health.

3.26(d) Repeat

Facilities, indoor.

Some interior surfaces in the building for the guinea pigs are not substantially impervious to moisture. The ceiling and some of the wall surfaces are constructed of treated wood or treated particle board that has not been sealed. Some areas

Inspection Report

of the ceiling show signs of water damage. The painted surfaces of the cage changing and drying station has worn off and the surface has multiple scratches and dings. The support poles for the two newer racks are unpainted and showing signs of water damage. The floor is compacted dirt.

Interior surfaces of indoor housing for guinea pigs should be maintained in a manner that renders the surfaces substantially impervious to moisture. All interior surfaces must be sealed to prevent moisture from seeping through and to facilitate sanitization.

3.31(b)

Sanitation.

There are items and empty bags of food being stored in the room that have collected dust and cobwebs. There is also an excessive amount of dust on the surfaces in the room and sheets of cobwebs in the ceiling and various areas in the room.

The housekeeping items identified during the inspection prevents prescribed husbandry practices set forth in this subpart from being performed effectively. Accumulated trash and unnecessary items must be removed and surfaces cleaned.

Correct by September 28, 2022

This inspection and exit interview were conducted with the licensees.

The licensee expressed that they will surrender their license and request a one-time exemption to sell the remaining guinea pigs.
