New York, NY 10022

Customer ID: **6017649**
Certificate: **21-T-0515**
Site: 011
Emirates SkyCargo (JFK)

Type: ROUTINE INSPECTION
Date: 13-DEC-2023

3.15(a)(1)

Primary enclosures used to transport live dogs and cats.

On November 17, 2023 a domestic long-haired cat, "Ambrose," was scheduled to depart from John F. Kennedy International Airport (JFK) to Dubai International Airport (DXB) on Emirates flight# EK 202 (AWB# 176-80060923).

The carrier containing the cat was damaged during transport from the cargo facility to the airplane. The enclosure had a jagged defect that ran the width of top of the carrier. The cat was secure, received a new enclosure, and later reached its destination.

Primary enclosures must be strong enough to securely contain animals and to withstand the normal rigors of transportation.

This inspection and exit interview were conducted with cargo and airline representatives.
