Certificate: **93-C-1102**
Site: 001
CITY OF MERCED

Type: RE-LICENSE INSPECTION
Date: 03-NOV-2022

3.127(d)

Facilities, outdoor.

The previous perimeter fence variance for housing non-carnivorous/non-dangerous animals in an enclosure that utilizes the perimeter fence as the enclosure fence is no longer valid. The mule deer enclosure uses the perimeter fence as the primary enclosure fence. This fence is vertical split rail to approximately 6 feet, with welded wire and barbed wire above that to approximately 8 feet with three strand barbed wire above, angled out at approximately 45 degrees. On the opposite side of the facility, the three strand barbed wire is no longer in good repair. In another area of the perimeter fence, there is a tree directly adjacent to the perimeter fence that decreases the effective height of the perimeter fence. The perimeter fence must be constructed and maintained so that it restricts animals and unauthorized persons from going through it or under it and so that it can function as secondary containment for the animals in the facility. Perimeter fences less than 3 feet from primary enclosure fences must be approved in writing by the Administrator (variance) and a new variance must be submitted to Animal Care and approved by Animal Care. Perimeter fences must also be maintained in good repair and meet or exceed the effective height required based on the species in the facility.

Correct by your next scheduled Re-License inspection.

Inspection Report

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by 1 January 2023 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires on 11 December 2022.
