Type: ROUTINE INSPECTION
Date: 06-MAY-2015

2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The program of veterinary care could not be located at time of the inspection and the licensee stated the veterinarian is due to make an annual visit. Pigs have recently been treated with Ivermectin for a mite problem This medication /treatment plan and all other medications /treatments used for animals at this facility must be addressed in the written program of veterinary care. A program of adequate veterinary care includes a discussion with the veterinarian about routine treatments and medications used on the animals . The written program for veterinary care must be signed by the veterinarian and made available to USDA at time of the inspection .

CORRECT BY : 5-18-2015

3.127(d)

FACILITIES, OUTDOOR.

Four coat imundis are housed in an enclosure with no perimeter fence . A perimeter fence prevents and restricts unauthorized persons or other animals from contacting the coati mundis . It may also serve as a secondary containment fence should the animals escape their primary enclosure. A perimeter fence at least 6 feet tall and at least 3 feet from the primary enclosure must be constructed around these animals . CORRECT BY : 6-11-15

The inspection at the new site and the exit briefing was conducted with the owner.

This site must be in compliance prior to license being valid for exhibiting.
