Type: ROUTINE INSPECTION
Date: 18-OCT-2016

3.78(d) CRITICAL

OUTDOOR HOUSING FACILITIES.

On the night of July 13, 2016, three spot nosed guenons were attacked by two outside dogs. This incident happened after hours of operation. Two of the guenons were discovered dead and one was euthanized the following morning. A small terrier type dog was captured on surveillance video and a beagle was trapped and removed from inside the facility the following night. After the incident, staff at the facility did a perimeter fence check and found one spot where ground had sunk, providing a six inch gap and a route of possible entry for the dogs. Part of the perimeter gate that is used to allow train access was noted to have some damage that resulted in an opening through which the dogs could have also gained access. Personnel stated at the time of inspection that these gates are open during business hours and the dogs could have possibly entered during this time and then shut inside the facility at night. The perimeter fencing encompasses 148 acres of wooded property and gates are opened during operative hours. Perimeter fencing must be constructed so that it protects non human primates by restricting unauthorized humans and animals the size of dogs, skunks and raccoons from going through it or under it and having contact with the nonhuman primates. The perimeter fencing is ineffective at restricting entry of unauthorized animals. The facility must take measures to prevent access of unauthorized humans and animals into the facility.

Correct by:

Since the incident occurred, the facility now checks the perimeter fencing integrity monthly, traps are placed around the perimeter fencing area, and exterior fencing at the facility's train exit and entry point were constructed to prevent further unauthorized access.

This inspection and exit interview were conducted with the general curator.

Additional Inspectors

Moore Mary, Veterinary Medical Officer
