Pine Mountain, GA 31822

Customer ID: **32761**  
Certificate: **57-C-0221**  
Site: 001  
WILD ANIMAL SAFARI INC

Type: ROUTINE INSPECTION  
Date: 09-MAR-2023

---

### 3.75(c)(3)

#### Housing facilities, general.

The indoor primary enclosure housing two squirrel monkeys was in need of cleaning. A thick layer of opaque brown/black material was coating many of the wooden panels and diamond shaped lattice that made up the enclosure as well as the elevated perch made of PVC tube. Black/brown staining could also be seen at certain areas on the top section of the wooden side walls. The primates came into contact with all of the hard surfaces in need of cleaning. Lack of adequate cleaning may lead to odors, pests, and the spread of disease in addition to animal discomfort. All hard surfaces with which non-human primates come in contact must be spot-cleaned daily and sanitized at least once every two weeks or more often if needed to prevent an excessive accumulation of dirt, debris, food waste, and excreta. To be corrected by March 21, 2023.

This inspection and exit interview were conducted with facility representatives.

Additional Inspectors:

E GONZALEZ, VETERINARY MEDICAL OFFICER
