Animal Ark Inc.  
PO Box 60057  
Reno, NV 89506

Customer ID: **3425**  
Certificate: **88-C-0027**  
Site: 001  
ANIMAL ARK, INC.

Type: ROUTINE INSPECTION  
Date: 12-DEC-2023

---

### 2.40(a)

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The birds were not listed on the written program of veterinary care (PVC) for this facility. Failure to include birds on the written PVC can result in a lack of veterinary guidance on the care of animals, adequate treatment, and consultation with the attending veterinarian when there are animal health and well-being problems. The licensee must update the written program of veterinary care to include birds.

Correct by: 01/03/2024

### 3.125(a)

#### Facilities, general.

There was exposed sharp points in both the bobcat enclosure and the serval enclosure. There was an approximately 12inch long section of hardware cloth in the bottom of the dividing wall in the off exhibit area of the bobcat enclosure. The gate to this area was left open, allowing the bobcat easy access to the wire patch and there was also visible urine scalding at that section of fence. The serval had an 8inch section of hardware cloth with sharp edges turned into the enclosure. Sharp point and edges are a potential risk to the health and welfare of the animals. Enclosures must be maintained in good repair and protect the animals from injury.

Correct by: 12/27/2023

### 3.154

#### Environment enhancement to promote psychological well-being.

The facility did not have a documented environment enhancement plan to promote psychological well-being of their avian species as required by the Animal Welfare Act. The facility must develop, document and follow a species appropriate plan for environmental enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian, and at a minimum must address social grouping, environmental enrichment, special considerations, restraint, and exemptions to the plan regulation and be in accordance with currently accepted professional standards for each species group.
