Type: ROUTINE INSPECTION
Date: 11-JAN-2024

2.40(a)(1)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The program of veterinary care has not been updated to include birds. A program of veterinary care is required to ensure facilities are communicating with and following recommendations from their veterinarian. Each dealer and exhibitor shall employ an attending veterinarian under formal arrangements. In the case of a part-time attending veterinarian or consultant arrangements, the formal arrangements shall include a written program of veterinary care that includes all regulated animals and regularly scheduled visits to the premises.

Correct by: Feb 1, 2024

3.127(c)

Facilities, outdoor.

Approximately 5 pot-bellied pigs were housed in an enclosure with excessive mud. The pigs had minimal dry area to escape from the mud. Prolonged exposure to wet, muddy conditions could predispose the pigs to foot and health problems. A suitable method shall be provided to rapidly eliminate excess water and allow the pigs to escape the mud if they choose.

Correct by: Jan 22, 2024

3.131(a)

Sanitation.

The coati's enclosure had an accumulation of old food and feces on the bottom of the enclosure. Old food can become spoiled and cause illness in the animals. Old food and feces can attract flies and pests which could cause stress and/or illness in the animals.

Enclosures shall be cleaned as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and to reduce odors.

Inspection Report

The facility does not have a plan for environmental enhancement for the birds. Birds are extremely intelligent animals and require mental stimulation for their health and well-being. Dealers, exhibitors and research facilities must develop, document, and follow a species-appropriate plan for environment enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian and must be in accordance with the regulations and with currently accepted professional standards as cited in appropriate professional journals or reference guides.

Correct by: Feb 1, 2024

3.158(a)(1)

Cleaning, sanitization, housekeeping, and pest control.

The large macaw enclosure had an accumulation of old food and feces on the ground. Old food can become spoiled and cause illness in the animals. Old food and feces can attract flies and pests which could cause stress and/or illness in the animals.

Excreta and food waste must be removed from primary enclosures and from under and around primary enclosures as often as necessary to prevent excessive accumulation of feces and food waste.

Correct by: Jan 22, 2024

This inspection and exit interview were conducted with facility representatives.
