WATERING.

The pond that functions as the source of drinking water for the white tail deer housed in the northern side of the deer enclosure is frozen over and no other source of drinking water is available. Lack of drinking water does not ensure for the health and comfort of the deer. Provide an alternate source of drinking water for the deer. A water tank was provided to the deer during the inspection process.

This inspection and exit interview were conducted with facility representatives.

End of report.
